PROJECTS

Tasky web application :
Tasky is built using HTML, CSS, BOOTSTRAP, JAVASCRIPT.
It is an user friendly application used for making TO-DO-LISTS.
The user can add any number of Tasks to be done. The user can even take a note, whether the task is done or is pending.
It is compatible with all the screen sizes.

Hotstar and zomato landing page :
Hotstar and zomato landing page built in pure HTML, CSS and Bootstrap.
The cloned landing page is fully responsive, looks excatly same as original landing page of 2022 and works well with all screen sizes.

A Guessing game :
The game is built in HTML, CSS, JAVASCRIPT.
The game asks the user to guess a random number between 1-20 that it generates. If the user had a correct guess, the score increases by 1 and if the user had a wrong guess, the score decreases by 1 and gives a hint to the user for the correct number and maintains the highest score

Personal portfolio :
I have used HTML, CSS, BOOTSTRAP for my personal portfolio page.
It gives all the skills that I know, my education, my projects in detail, my hobbies.
